Limited Review Report of Condensed Consolidated Interim Financial Statements

To: Board of Directors of Credit Agricole - Egypt (SAE)

Introduction

We have performed a limited review on the accompanying condensed consolidated interim statement of financial position of Credit Agricole Egypt (SAE) (the Bank) and its subsidiary (together "the Group") as at 30 June 2023 and the related condensed consolidated interim statements of income. comprehensive Income, changes in equity and cash flows for the six months then ended, and other explanatory notes. Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with the rules of preparation and presentation of banks' financial statements and basis of recognition and measurement issued by the Central Bank of Egypt on December 16, 2008 as amended by the regulation issued on February 26. 2019 and its subsequent interpretive instructions and central bank of Egypt board of directors resolution on 3 May 2020 regarding issuing condensed consolidated interim financial statements for banks and with the requirements of applicable Egyptian laws and regulations. Our responsibility is to express a conclusion on these condensed consolidated interim financial statements based on our limited review.

Scope of Limited Review

We conducted our limited review in accordance with the Egyptian standard on review engagements (2410) "Review of interim financial information performed by the independent auditor of the entity". A limited review of condensed consolidated interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters in the Group and applying analytical and other limited review procedures. A limited review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these condensed consolidated interim financial statements.

Conclusion

Based on our limited review, nothing has come to our attention that causes us to believe that accompanying condensed consolidated interim financial statements are not prepared, in all material respects, in accordance with the rules of preparation and presentation of banks' financial statements and basis of recognition and measurement issued by the Central Bank of Egypt on December 16, 2008 as amended by the regulation issued on February 26, 2019 and its subsequent interpretive instructions and Central Bank of Egypt board of directors resolution on 3 May 2020 regarding issuing condensed consolidated interior financial statements for banks and with the requirements of applicable Egyptian laws and regulations.

B. Market risk

The bank takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency and equity products all of which to expect are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads foreign exchange rates and equity prices The bank separates exposures to market risk into either trading or non-trading portfolios.

The market risks arising from trading and non-trading activities are concentrated in bank treasury and monitored by two teams separately. Regular reports are submitted to the Board of Directors and heads of each business unit regularly.

Trading portfolios include those positions arising from market-making transactions where the bank acts as principal with clients or with the market.

Non-trading portfolios primarily arise from the interest rate management of the entity's retail and commercial banking assets and liabilities. Non-trading portfolios also consist of foreign exchange and equity risks arising from the bank's held-to-maturity and available-for-sale investments.

C. Interest rate risk

- Interest rate risk is the risk to income or capital arising from fluctuating interest rates. Interest rate risk is a vital part of the Bank's business activity as taking on excessive interest rate risk exposure can potentially threaten earnings and the Bank's equity.
- Accordingly, interest rate risk is measured to manage the level of exposure to adverse movements of interest rates and limit the potential risk that can be derived.

D. Liquidity risk

- Liquidity risk management is the ability to accurately identify and quantify the main sources of the bank's liquidity risk in a timely manner.
- Liquidity risk arises from either the bank's inability to meet its obligations as they fall due or to fund increases in assets without incurring undesirable cost or losses.
- Liquidity risks are categorized into two risk types:
 - Funding liquidity risk when the Bank cannot fulfill its payment obligations because of an inability to obtain funding.
 - Market liquidity risk when the Bank is unable to sell or transform its Liquidity buffer into cash without significant losses.

3. Segment analysis

Segment activity involves operating activities, assets used in providing banking services, and risk and return management associated with this activity, which might differ from other activities. Segment analysis for the banking operations involves the following:

Large, medium, and small enterprises:

Including current account, deposit, overdraft account, loan, credit facilities, and financial derivative activities.

Investment:

Encompasses money management activities.

Retail:

Encompasses current account, saving account, deposit, credit card, personal loans, and real estate loans activities,

Asset and liability management:

Encompasses other banking operations, such as asset and liability management. It also encompasses administrative expenses that can hardly be classified with other sectors.

Transactions among segments are performed according to the bank's operating cycle, and include operating assets and liabilities as presented in the bank's statement of financial position.
